I am a 16 year old who pays \$10 each month for satellite radio. I pay for this service, so I should be able to enjoy all the channels as is, including traffic and weather. It is absolutely obsurd that Clearchannel would claim that it takes away from "Local" programming. Clearchannel clearly has an FM radio monopoly, and as such is attempting to eliminate all competition. This is simply their efforts to eliminate XM Radio and continue monopolizing radio with what they choose to make us listen to, instead of what we want. I want to continue to be able to choose what I listen to, which is what XM Radio lets me do. If you pay for XM Radio while FM is free, why should Clearchannel feel threated anyway? The local tv networks are available on most satellite TV; it didn't threaten them. This is simply an obsurd notion made by Clearchannel. If this petition succeeds, then you have succeeded in allowing another huge monopoly.
